The idea to publish a
Handbook of Economic

a natural consequence
of a discussion

concerning appropriate reading material for courses in economic psychology. The discussion took place a few years ago in the Department of Economic Psychology at Tilburg University, The Netherlands. It was noted that there was a surprising lack of collections of pertinent readings, to say nothing

themselves up for ruin.
The sad truth is that
most companies have
left their futures almost
entirely to chance, and
don't even realize it.

The reason? Managers
feel they must make
choices with far-
reaching consequences
today, but must base
those choices on
assumptions about a
future they cannot

predict. It is this collision between commitment and uncertainty that creates THE STRATEGY PARADOX. This paradox sets up a ubiquitous but little-understood tradeoff.

Because managers feel they must base their strategies on assumptions about an unknown future, the

For more ambitious of them hope their guesses will be right – or that they can somehow adapt to the turbulence that will arise. In fact, only a small number of lucky daredevils prosper, while many more unfortunate, but no less capable managers find themselves at the helms of sinking ships.

Realizing this, even if

only intuitively, most managers shy away from the bold commitments that success seems to demand, choosing instead timid, unremarkable strategies, sacrificing any chance at greatness for a better chance at mere survival.

Michael E. Raynor,
coauthor of the

historically reserved for the fortunate few even as they reduce the risks they must accept in the pursuit of success. In the cutthroat world of competitive strategy, this is as close as you can come to getting something for nothing.
