Excerpt from An Investigation of Rotations Produced by Current Form a Single-Phase Alternator: A Thesis Christmas Day, 1821, marks the primary production of magnetic rotation, when Michael Faraday¹ (17 91 - 1867 the greatest experimentalist of the nineteenth century in electricity and magnetism, obtained the revolution of a magnet around an electric current. This first electro magnetic rotation was produced by placing a small magnet in mercury, one end being weighted with platinum to keep it in an upright position, and passing a current down through the mercury in a manner indicated by Fig. 1. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works
