Motor Learning In Physical

1) Motor learning is an internal process that cannot be observed from an external perspective. This means that how much an athlete has learned is an unknown factor from an outsider's perspective because motor learning takes place inside the learner's brain and the muscular movements are only a reflection of brain activities.

Education And Sports

Motor learning is a relatively permanent change in the ability to execute a motor skill as a result of practice or experience. This is in contrast to performance, the act of executing a motor skill that results in a temporary, nonpermanent change. One way to conceptualize this difference is to consider the change of state in an egg (Schmidt & Lee, 2014).
