This title is directed primarily towards health care professionals outside of the United States. Written by authors with clinical and research experience, this book is intended for midwives and student midwives participating in Diploma, Advanced Diploma and first level degree programmes. It aims to increase research awareness and develop the skills of critical appraisal of research evidence that are essential to evidence based practice.

Doody's Review Service - 5 Stars!The Second Edition of Evidence-Based Practice for Nurses: Appraisal and Application of Research continues to serve as the definitive reference for transitioning research into nursing practice. Based on the innovation-decision process (IDP), each unit is shaped according to the five steps of the IDP: knowledge, persuasion, decision, implementation, and confirmation. This unique organizational approach combined with updated case studies and ethical principles allows the research process to be tangible and linked with strategies that promote advancement.

Region: Africa, grade: 70, Obafemi Awolowo University, course: Political Science, language: English, abstract: This term paper deals with the following questions: To what extent does Local Government autonomy influence service delivery in Nigeria? Do Local Government constitutional powers and functions enable execution of service delivery in Nigeria? Does Local Government autonomy has any impact on service delivery at the grassroots in Nigeria? It is a piece that revolves around Local Government. It aims at examining Local Government against the backdrop of its autonomy and the consequences on service delivery in Nigeria. Do access the groundbreaking analysis so as to be abreast with contemporary research on Local Government in Nigeria. The overall aim of this study is to critically examine the nexus between Local Government autonomy and effective social service delivery. In the light of this, the study seeks to examine the degree of Local Government autonomy on service delivery in Nigeria and to appraise constitutional powers and functions of Local Government as regards service delivery. It also examines the impact of Local Government autonomy on service delivery in Nigeria. Based on the aforementioned research questions, the following research assumptions are formulated for this study: Local Governments ineffectiveness and inefficiency on service delivery are due to their lack of autonomy. Constitutional powers and functions of the Local Government do not enhance service delivery at the grassroots. Local Government autonomy has no impact on service delivery in Nigeria.

Critical appraisal is now accepted as central to the development of rational health care and evidence-based medicine, by applying it to questions of aetiology, clinical therapy, and health care management. The reader will learn how to assess the strengths and weaknesses of new studies, and how to conduct their own studies.

Since publication of the first three editions of this hugely successful book, systematic methods of critical appraisal have been accepted as central to healthcare provision, both in critical applications and in a wider health services and community perspective. This new edition builds on the work of the previous editions by presenting a fully updated and accessible system of critical appraisal applicable to clinical, epidemiological, and public health studies, and related fields. The book outlines the systematic review process for the establishment of causal effect within single and multiple studies. Focusing primarily on study design, it covers randomized and non-randomized trials, cohort studies, case-control studies, and surveys, showing the presentation of results including person-time and survival analysis, and issues in the selection of subjects. It then describes the process of detection and assessment of selection biases, observation bias, confounding, chance variation, and how to determine internal validity and external validity (generalizability). Statistical methods are presented in an accessible way, illustrating applications to each study design. Positive features of causation including strength, dose-response, and consistency are also discussed. The final chapters provide six examples of critical appraisals of major studies, encompassing

randomized trials, prospective and retrospective cohort studies, and case-control studies. Statistical issues are explained clearly without complex mathematics, and the most useful methods are summarized in the appendix, each with a worked example. Each main chapter includes self-test questions, with answers provided, making the book ideally suited to readers with no prior epidemiological or statistical knowledge. Developed over four editions, *Critical Appraisal of Epidemiological Studies and Clinical Trials* is an invaluable aid to the effective assessment of new studies in epidemiology, public health, research methods, evidence-based methods, clinical medicine, and environmental health; making it essential reading for postgraduates, practitioners, and policymakers in these fields.

Designed for students of applied linguistics and second language acquisition on research training courses, practising language teachers, and those in training, this combination textbook/workbook is a set or recommended textbook on more than a hundred undergraduate and postgraduate courses worldwide. Now in its second edition, it remains the only book to provide specific advice and support to those wishing to learn a methodical approach to the critical analysis of a research paper. It seeks to answer a current need in the literature for a set of procedures that can be applied to the independent reading of quantitative research. Innovative features of the workbook include awareness-raising reading tasks and guided exercises to help develop and practise the critical skills required to appraise papers independently. Through informed and constructive appraisal of others work,

readers themselves are shown how to become more research literate, to discover new areas for investigation, and to organise and present their own work more effectively for publication and peer evaluation. This revised second edition sees a closer integration of the text-and workbook and a number of additions to the text itself, as well as further guided and unguided research appraisal exercises."
