thought we knew how dinosaurs lived their lives. In this remarkable new book, Brian J. Ford reveals that dinosaurs were, in fact, profoundly different from what we believe, and their environment was unlike anything we have previously thought.

After ruining Earth and soaring off to a star in his rocket, the man returns to find that ancient creatures have beautified the earth and it is where he wants to live after all.

Books that runs throughout the entire book is that, for the past century, evolutionists have been brainwashing us with bogus claims while actively and passively covering up evidence showing that humans coexisted with dinosaurs and that evolution is basically a hoax. 100-Year Cover-up Revealed: We Lived With Dinosaurs not only proves the reality of coexistence and the fallacy of evolution, but also shows how the suppression of these facts has polluted our laboratories, classrooms, and media. Finally, this book highlights the scientific and educational
