Measurement and Evaluation | Global Health Sciences

MEASURE Evaluation developed and applied a variety of tools to strengthen health information systems and improve decision making in the health sector. To learn how this work is continuing after the MEASURE Evaluation project, please visit Data for Impact , PMI Measure Malaria, and TB DIAH. Many of these tools have contributed to international standardization of methodologies and strengthened host-country capacity for decision making.

Tools — MEASURE Evaluation

1. Introduction. Evaluation is an essential part of quality improvement and when done well it can help solve problems, inform decision making and build knowledge. While evaluation comes in many shapes and sizes, its key purpose is to help us to develop a deeper understanding of how best to improve health care.

Evaluation: what to consider ... - The Health Foundation

Evaluation assists with using the data and information to judge success or failure. Evaluation can take place without numerical measurement as it measures performance. Measurement requires some standardized tools for measuring. A speedometer measures the speed of the moving car and a thermometer measure the temperature of a give space.

Difference between Measurement and Evaluation | Difference ...

1. Distinguish clearly between Assessment, Measurement and Evaluation. Other definitions of evaluation as given by practitioners are: 1. A systematic process of determining what the actual outcomes are but it also involves judgement of desirability of whatever outcomes are demonstrated. (Travers, 1955) 2.
