Nys Regent Relationships And Biodiversity Lab

This video breaks the Relationships and Biodiversity State Lab into 10 steps that students can follow in a sequential manner. The steps break the information in the lab into comprehensible chunks and actionable steps that students can complete one at a time. The guided notes referenced in this video can be found here.

Guided Directions - Relationships & Biodiversity (NY State ...

Biodiversity has important benefits to mankind, including development of new food sources and medicines; as well as beneficial, free, ecosystem services. Ecosystem degradation and destruction lead to the loss of genetic biodiversity and increases the chance that an ecosystem will become less stable and collapse. Procedures* Safety precautions are moronic for this lab.

This lab has 7 tests used to determine the relatedness of 4 plant samples. Remember that scientists use a variety of evidence to determine evolutionary relationships, including cell types, structural morphology, DNA, behavior, embryology, and fossils. The more criteria that are shared between organisms, the more likely they are closely related.
