The same rules apply here as they did for mixing green: if you want the most vivid orange, mix a yellow that leans towards red with a red that leans toward yellow.

Oil Painting Tips & Techniques for Correctly Mixing Colors ...

These colors represent certain basic qualities: Viridian green - a very transparent, pure, cold, strong and utterly immaterial bluish green. Like menthol. You can't mix... Green earth - everything you paint in green earth and white becomes like an immaterial dream or memory. But the... chromium ...

Color Mixing Guide - painting-ideas-and-techniques.com

The key to mixing color is understanding the various aspects that make up any given shade: hue, chroma, and value. Put simply, the hue is what a layman might call the color itself; the chroma is the degree of saturation, and the value is the degree of lightness or darkness.

All about Paint Color Mixing: Chart the Wheel & Mixing Guide

Mix the two colors on either side of the color you want to make that color. To make tints, you make pure versions of basic hues and then add white to them. You make shades by adding black or complementary hues to the pure hues. To those shade mixtures, you add white to make tones. As you add white, black, and complementary colors to your pure hues, you change their values and their intensities in very specific ways. Complementary hues are directly across from each other on the color wheel.

Oil Painting For Dummies Cheat Sheet - dummies

Beginning with the base middle green paint, modify the hue and temperature with a yellow (to make a lighter, warmer, more yellow green) or blue (to make a darker, cooler, more bluish-green) paint. Second, modify the saturation with any warming or neutralising colour from orange to violet (it usually takes a very small amount to start dulling or desaturating the colour).

Mixing a Variety of Greens in Two Steps - Jackson's Art Blog

Mix the two colors on either side of the color you want to make that color. To make tints, you make pure versions of basic hues and then add white to them. You make shades by adding black or complementary hues to the pure hues. To those shade mixtures, you add white to make tones. As you add white, black, and complementary colors to your pure hues, you change their values and their intensities in very specific ways
