The Sony A7 and A7R were the world's first mirrorless, interchangeable lens cameras with a full-frame sensor. Since their release, Sony has expanded the series, adding the A7S and A7II models. All of the cameras in the series are intended for amateurs to semi-professionals who want to jump into photography with a camera that combines compact size with the performance of a high end DSLR. While the camera manual explains what the camera can do, it doesn't show exactly how to use the camera to create great images! That's where Sony A7 Series: From Snapshots to Great Shots comes in. Starting with the top ten things users need to know about the camera, author Brian Smith carefully guides readers through the operating features. Readers get practical advice from a pro on which settings to use when, great shooting tips, and end of chapter assignments. In this book, updated from the Sony A7 / A7R: From Snapshots to Great Shots (2014), Brian will: • Include an entire new chapter on Menu Settings and Camera Setup for the various cameras in the A7 series. • Update and expand the video chapter to include new features in the Sony A7S and A7II, like XAVC S recording and Picture Profiles. • Update the content covering new features like 5-Axis SteadyShot<sup>™</sup> only found in A7II so that the text can apply to possible future cameras with this feature • Extensively update the Lens Adapter and Accessories chapters to cover new features and gear. • Replace some of the photos to include shots from the A7S and A7II in the mix. The A7 Series camera features include: • Exmor CMOS full frame sensor (with different megapixels depending on camera version) • TruBlack XtraFine LCD screen (3"/ 7,5 cm) with 921.6K dots resolution with tilt functionality • 1.3 cm (0.5inch) Electronic Viewfinder • 1200-zone evaluative light metering • Built-in Wi-Fi and NFC • LED-auto focus illuminator • Multi Interface Shoe • 9 customizable buttons and 45 assignable functions Key differentiating features among the cameras: • A7: 24MP and fast hybrid-autofocus. • A7R: 36MP version, with new, higher-density sensor design, but without optical low-pass filter of A7. Also does not include the faster hybrid auto-focus system in base model. • A7S: High-sensitivity version with an effective ISO range from 100 to 409600 and with 4K video capability, but only 12MP. • A7II: Uses the same sensor (with minor tweaks) as the original A7, but updates the external ergonomics and adds image stabilization as the world's first 5-axis sensor-shift image stabilization system for a full-frame ILC. The A7II has the same 50Mbit XAVC-S codec as the A7S but lacks 4K video.

The principal objective of this symposium was to bring together investigators from all over the world who work in diverse areas of research but share a common interest in the physiologic and pathophysiologic functions of the nucleoside adenosine. In 1978, the "International Conference on Physiological and Regulatory Functions of Adenosine and Adenine Nucleotides," held in Banff, Canada, served as an effective catalyst in enabling scientists with different points of view to exchange information and ideas on this subject. Since 1978, the amount of research on different aspects of adenosine metabolism, mechanism of action, transport, and function in various tissues (in both normal and abnormal states) has increased exponentially, and there was an urgent need for another meeting for updating information on this burgeoning subject. The focus of the meeting was extremely sharp, but the scope of the subject material was very broad. Scientists categorized as chemists, biochemists, physiologists, pharmacologists, and immunologists, working with cells and cell fragments, with tissues such as heart, brain, muscle, fat, kidney, and with human beings having immune deficiency diseases participated in the symposium. They had an opportunity to air their differences, reinforce their areas of agreement, and, most important, they educated each other with respect to research on adenosine; it is hoped that they also enriched their own research programs from the information they gained from their fellow participants.
