Barracough's stake in this chapter is centered more decisively on cultural politics and particularly on how charros in Texas confronted white imperialist nostalgia and violent settler narratives of the cowboy, in the process demonstrating how charros were part of the storied Mexican American generation and, indeed, the history of the West. Political culture describes how culture impacts politics. Every political system is embedded in a particular political culture. Its origins as a concept go back at least to Alexis de Tocqueville, but its current use in political science generally follows that of Gabriel Almond.

Culture is one of the most complex and contested fields of European integration. This book analyzes EU cultural politics since their emergence in the 1980s with a particular focus on the European Capital of Culture program, the flagship of EU cultural policy. It discusses both the central as well as local levels and contextualizes EU policies with programmes of other European organisations, such as the Council of Europe. By asking what "Europe" actually means for European cultural policy, the book goes beyond the confines of official organizations and the political sphere, to discuss the contribution, impact and appropriation among a more diverse group of actors and participants, such as transnational experts, local bureaucrats, cultural managers, urban dwellers and the visitors. Its principal aim is to debunk the myth of Brussels as the centre of cultural Europeanization. Instead, it argues that European cultural policy has to be seen as a relational, multi-directional movement, involving a wide variety of stakeholders and leading to conflicts and collaborations at various levels. This book combines the perspectives of political scientists, sociologists, anthropologists and historians, at the intersection between EU, urban, and cultural studies, and changes our understanding of 'Europeanization' by opening up new empirical and conceptual avenues. Challenging the dominant interpretation of European cultural policies, *The Cultural Politics of Europe* will be of interest to students and scholars of European studies, political scientists, sociologists, anthropologists, geographers, historians and cultural studies.

A bold exploration of the relationship between emotions and politics, through case studies on international terrorism, asylum, migration, reconciliation and reparation. Develops a theory of how emotions work and their effects on our daily lives.

In 2008 another economic crisis emerged in the long history of capitalism which created a period of 'austerity economics' across

many nations. *Cultural Politics in the Age of Austerity* examines how austerity has impacted upon cultural politics in relation to understanding how established power is both maintained and challenged. The book begins by detailing the meaning of cultural politics before exploring themes such as media discourse, austerity narratives, class, cultural hegemony/government policymaking, social movements and the European Union, and left responses to austerity. It also includes chapters tracing cultural politics in Spain, with a focus on anti-austerity movements and the relationship between austerity and Spanish football. *Cultural Politics in the Age of Austerity* assesses the impact of a range of cultural/political forms concerning the dynamics of society and relations of power during times of crisis. As such, it will appeal to scholars of culture, media, politics, philosophy, sociology and social psychology.

Children's book awards have mushroomed since the early twentieth-century and especially since the 1960s, when literary prizing became a favored strategy for both commercial promotion and canon-making. There are over 300 awards for English-language titles alone, but despite the profound impact of children's book awards, scholars have paid relatively little attention to them. This book is the first scholarly volume devoted to the analysis of Anglophone children's book awards in historical and cultural context. With attention to both political and aesthetic concerns, the book offers original and diverse scholarship on prizing practices and their consequences in Australia, Canada, and especially the United States. Contributors offer both case studies of particular awards and analysis of broader trends in literary evaluation and elevation, drawing on theoretical work on canonization and cultural capital. Sections interrogate the complex and often unconscious ideological work of prizing, the ongoing tension between formalist awards and so-called identity-based awards – all the more urgent in light of the "We Need Diverse Books" campaign – the ever-morphing forms and parameters of prizing, and scholarly practices of prizing. Among the many awards discussed are the Pura Belpré Medal, the Inky Awards, the Canada Governor General Literary Award, the Printz Award, the Best Animated Feature Oscar, the Phoenix Award, and the John Newbery Medal, giving due attention to prizes for fiction as well as for non-fiction, poetry, and film. This volume will interest scholars in literary and cultural studies, social history, book history, sociology, education, library and information science, and anyone concerned with children's literature.

Theater and Cultural Politics for a New World presents a radical re-examination of the ways in which demographic shifts will impact theater and performance culture in the twenty-first century. Editor Chinua Thelwell brings together the revealing insights of artists, scholars, and organizers to produce a unique intersectional conversation about the transformative potential of theater. Opening with a case study of the New WORLD Theater and moving on to a fascinating range of essays, the book looks at five main themes:

Changing demographics Future aesthetics Making institutional space
Critical multiculturalism Polyculturalism

This book examines the middle classes – who they are and what they do – and their influence in shaping contemporary cultural politics in India. Describing the historical emergence of these classes, from the colonial period to contemporary times, it shows how the middle classes have changed, with older groups shifting out and new entrants taking place, thereby transforming the character and meanings of the category. The essays in this volume observe multiple sites of social action (workplaces and homes, schools and streets, cinema and sex surveys, temples and tourist hotels) to delineate the lives of the middle classes and show how middle-class definitions and desires articulate hegemonic notions of the normal and the normative.

Using an innovative syncretic 'cultural politics' approach drawing on political theory, film studies and sociology, this book unpacks how political myths about states, citizens, community, intimate life and social criticism operate in Hollywood narratives.

The Cultural Politics of Food and Eating offers an ethnographically informed perspective on the ways in which people use food to make sense of life in an increasingly interconnected world. Culture and Cultural Politics Under Reza Shah presents a collection of innovative research on the interaction of culture and politics accompanying the vigorous modernization programme of the first Pahlavi ruler. Examining a broad spectrum of this multifaceted interaction it makes an important contribution to the cultural history of the 1920s and 1930s in Iran, when, under the rule of Reza Shah Pahlavi, dramatic changes took place inside Iranian society. With special reference to the practical implementation of specific reform endeavours, the various contributions critically analyze different facets of the relationship between cultural politics, individual reformers and the everyday life of modernist Iranians. Interpreting culture in its broadest sense, this book brings together contributions from different disciplines such as literary history, social history, ethnomusicology, art history, and Middle Eastern politics. In this way, it combines for the first time the cultural history of Iran's modernity with the politics of the Reza Shah period. Challenging a limited understanding of authoritarian rule under Reza Shah, this book is a useful contribution to existing literature for students and scholars of Middle Eastern History,

Iranian History and Iranian Culture.

has been sparking controversies ever since sumptuary laws marked it as a luxury item and as a sign of medieval class privilege. Drawing on wide-ranging historical and contemporary sources, Julia V. Emberley explains how a material good has become both a symbol of wealth and sexuality, and a symptom of class, gender, and imperial antagonisms.
